

My name is George Class-Peters Jr. I was born in New York, but I was raised from the age of eight in central Delaware. One of the blessings attached to the move was my discovery and involvement with the National FFA Organization. Through my time in the FFA, and other organizations, I have gained a vast variety of skills and abilities that I may have otherwise not had the opportunity to develop and hone in on. From intrapersonal interaction etiquette to presentation and leadership skills, to tractor driving skills the FFA has taught me a great deal.

Career Development Events were a very large drawing point for me, I have participated in parliamentary procedure, agriscience fair, horse judging, farm business management, and tractor operations on the state, regional, and national levels. My SAEs included taking care of dog, managing my high school greenhouse, and completing my agriscience fair research. In 2017-2018 I received my state degree and I was named the Delaware FFA State Star in Agriscience Research. I am extremely proud of my accomplishments, but they would be meaningless if they didn't inspire other students to go for their goals no matter how unattainable they may seem. Additionally, these accolades would be impossible without the love and support of my immediate family and my FFA family. I have been blessed with the best advisors that this organization has to offer, and I have been afforded the strongest support team I could have asked for.

Currently I am a Sophomore Honors student at the University of Delaware studying Medical Diagnostics. I just completed my term as the Delaware State FFA Association Treasurer for the 2018-2019 year. I am actively involved in the alumni portion of current state officer development and encouragement. This immense honor and opportunity to chair this committee is not lost on me. I know that this work is of the utmost importance and I plan to give it my undivided attention and passion. I cannot wait to work with all the amazing individuals that will be involved in this process with me!
